Sub: Possible Business alliance towards project Female Tutoring project through Internet

Dear Mr Abdullah Butt,

Thank you very much for sending me the proposal which mentioned in detail about training and converting into Virtual Tutor to the present educated women, currently sitting at comfort of their home.

Pakistani families who are desirous of providing their Children good education, as in UAE there are 1.4 million Pakistanis, and from them as per family size, **there are 150,000 Pakistani students**, studying Pakistani and UK based curriculum. This step of Educast will not only provide quality and affordable education to Pakistan students with in UAE, but will also generate substantial inward revenues into Pakistan.

Your technical presentation clearly shows how EDUCAST has plan to develop very innovative solution, which will bring an edge towards Pakistan tutoring market internationally.

I have studied the proposal very carefully and did my research and confident that this project will take quite high profile standing among govt. and private sector.

We have been operating with in United Arab Emirates and have been involved in education and related fields since 1986 so your concept seems to be viable for us.

We would to explore the possibilities to be a part of this project after having a detailed discussions with you a although no final commitment .

Looking forward to hear from you soon.

Best Regards

Dr Muhammad Yousuf Qadri,
CEO
QADRI
